Peace and calmness are the main inspirations to develop the interiors of the spaces, both felt within the atmosphere while welcoming its guests. A color narrative of cream and aqua palettes is followed throughout the inner spaces, two calming and muted hues which provide the necessary frame of mind to favor contemplation and serenity.

Art, calligraphy, furniture and locally inspired motifs in rugs and lattices reinforce the sense of place, strengthened by the use of lights which multiply these Arabic patterns in walls, floors and ceilings to provide a natural continuity in the peaceful mood of the visitors to one of the world's most venerated spots. The hotel, with 251 guest rooms units, manifests the cohesion of a millenary tradition which is reinterpreted through a contemporary interior design language recognizable to both local and international guests.
