

Intercon[Ⓢ]

Port De La Mer

Location: Dubai, United Arab Emirates

Year: N/A

Status: Completed

Program: Residential Development

The interior design of the residential complex takes its inspiration from the ocean. The modest and clear ambience is enriched with blue hues and shiny materials, a representation of the sea with all its colour tones and glimpses.

The Public toilets follow the same design line as the changing rooms: bright neutral walls against black cubicles, natural oak wood countertops, and 3D wall tiles in an accent color.
