Riu Palace Hotel

Location: Dubai, United Arab Emirates

Year: 2023

Status: Design

Program: Hotel

The search for a sophisticated, comfortable, and modern environment, inspired by the concept of anachronism and the surrounding landscape of the project, marks the bases and tones that lead to the composition of the following proposals.

The central axis of the main idea is the contrast between Old and New Dubai. This concept aims to bring the cultural history from the old town of Dubai into the modern building, using neutral sand colors as a background, and adding accent hues of its vibrant colors, textures, tastes, smells, and vivacity.

Lobby Bar

Public Toilets

The palette scheme dances with the golden whispers of the central deserts, giving the design a smooth and cozy character. Beige hues, inspired by stone and angular shapes, are complemented by details in oak tones, providing an exclusive atmosphere to the space. Desert Sand, a hue mirroring the sun-kissed dunes, embraces the feeling of warmth.

Elite Bar

Terracotta's awakening pays homage to the earth's ancient touch. Fabrics bloom in the oasis of Greens, offering a vibrant respite amidst the sand. Arches gracefully stand in the design, paying tribute to the region's architectural heritage.

Prepare to be captivated by the enchanting blend of Dubai's past and present, as we translate its marvelous features into an interior design that reflects the city's spirit and unrivaled grandeur.
